

EmerGeo Fusionpoint™

The emergency management team at EmerGeo has experienced first-hand the challenges of gathering and disseminating resources and information during a crisis. As a result, EmerGeo offers products and services designed to help emergency managers, planners and responders overcome these challenges before, during and after major emergencies and disasters.

EmerGeo Fusionpoint is event logging, data fusion and workflow technology that bring together data and processes from multiple emergency and non-emergency applications into a web portal dashboard, tailored to each role in your organization.

EmerGeo Fusionpoint can be used standalone or bring together:

- Crisis Information Systems
- Dispatch Systems
- Multiple GIS Mapping Applications
- Live Video Cameras
- Hazard Modeling
- Live Data Feeds
- Simulation Technology

EmerGeo Fusionpoint can deliver information on what has happened, what is happening, what could happen and where, in a collaborative view.

WHO? EmerGeo Fusionpoint was built by the global leader in crisis management information system development and consulting – EmerGeo Solutions Worldwide, Inc.

WHAT? EmerGeo Fusionpoint is built on the latest web fusion and open mapping technologies. It uses web services to connect to customers' existing systems to consume and transform data – the result is interoperability.

WHERE? EmerGeo Fusionpoint is web based so it can be accessed securely from anywhere.

WHY? Emergency managers need real-time data from multiple systems – brought together in one customizable dashboard.
