

.NET Software Developer

EmerGeo Solutions has an immediate opening for an experienced .NET Software Developer to work on contract in our Vancouver, BC office. If you possess a thorough understanding of the .NET framework and related technologies for Windows forms and web application development, including C#, ASP.NET, JavaScript, XML and web services, we would like to meet you.

In this position you will:

- Work closely with product management to design, develop and maintain Microsoft .NET applications
- Participate in all phases of the software development life-cycle: requirements analysis, development, testing and implementation
- Ensure that code is efficient, well documented, and follows best practices and standards
- Participate in technical specification, architecture, and design discussions

The types of knowledge and experience we are looking for is:

- 5+ years' Windows client-server and web application development, including high-volume transactional applications
- 2+ years' .NET-specific development with Framework 2.0/3.5, including ASP.NET and the creation and consumption of SOAP webservice
- 2+ years' MS SQL Server 2000/2005/2008
- Bachelor's degree in Computer Science or equivalent
- Disciplined in object oriented programming and design patterns
- Strong focus on user interface experience
- Ability to write test scripts, conduct unit testing, and create automated test suites
- Experience developing for or working in the emergency management or public safety fields is desirable
- Experience with GIS data and technology a definite asset

Specific technical skills we are looking for are:

- C#
- NHibernate, or similar ORM experience
- XSLT an asset
- WCF an asset
- JavaScript, ExtJS/Sencha and asset

Professional qualities we would like to see:

- A self starter with the ability to solve problems independently and learn quickly
- Strong written and verbal communication skills
- Willingness to both learn from and to mentor fellow team members
- Ability to multi-task in a fast paced environment

About EmerGeo Solutions

EmerGeo provides fully integrated situation awareness technology and services to help manage risk in Safety, Emergency Management, Security and Business Continuity for Enterprises and all levels of Government.

EmerGeo's unique Common Operating Picture (COP) technology provides reliable, world-class, open standards based enterprise risk management technology and professional services that will prove effective in helping government and industry to mitigate against, prepare for, respond to and recover from potential or actual incidents, natural disasters, acts of terrorism, or other major events.

EmerGeo responds rapidly to our customers needs by providing new software functionality which has been a key driver of our success. Our expansion into the US, Australia and Middle East has only intensified this trend.
