

Fusionpoint™

Crisis Management & Situational Awareness Software

Unite your data and people to make better decisions - faster

What Makes Fusionpoint Unique?

Unlike traditional crisis management software, Fusionpoint unites data from virtually any data source and delivers it in simple visual dashboards tailored to each emergency position.

Advanced mapping and analytics tools provide better insight on the situation and potential problems.

Automated alerts (triggers) provide an early warning capability to mitigate risk.

Data entry forms with pick lists and configurable displays make entry into an intuitive, modern, Microsoft-style web dashboard very simple to minimize training costs and maximize utilization.

Workgroup publishing is a unique feature to control who receives information on incidents, resources, critical infrastructure,

Importantly, an integrated fusion engine with custom *Connectors* enabling integration with other corporate systems you have invested in: dispatch and vehicle tracking, camera, crisis management and other systems.

See for yourself – take it for a ‘test drive’ today!

Detailed Feature List (Version 5.4)

■ Portal

- Tabbed display (“Dashboard”)
 - Configurable Tabs with layout and content controls
- Functional Portlets Included:
 - Quick Entry Forms
 - configurable pick lists
 - “Publish to” Control
 - Log
 - configurable name, layout, column display, data filters
 - Resource Manager
 - Web Content
 - add your existing web applications to the portal
 - Map
 - Feed Publisher/Manager
 - RSS Feed Reader
 - Rules & Alerts
 - Alert Notification Log
 - Rule Triggers (type, severity, proximity)
 - Subscriber Management
 - Alert Features (configure message content)
 - Admin & Maintenance
 - Network Monitor
 - Connection (“fuse”) Monitor

■ Dashboard

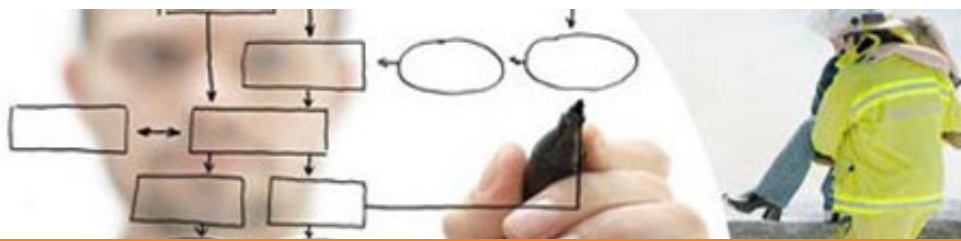

- Drag-and-drop Page Layout Controls
- Save Layouts by Role
- Export/Import Layouts

■ Integrated Web Mapping (“Navigator”)

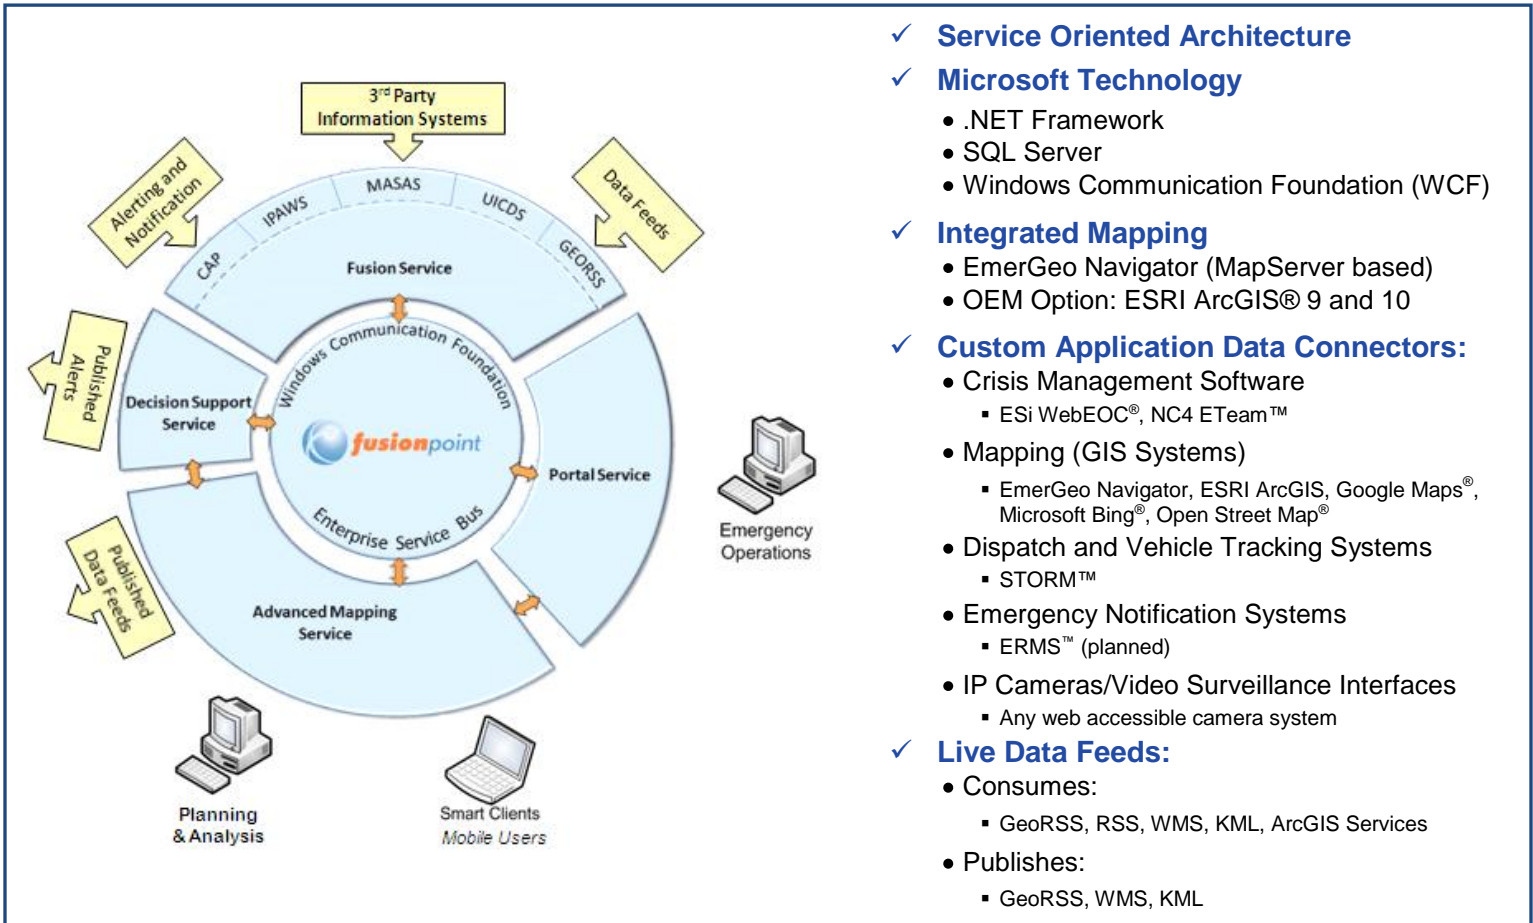

- Pan/Zoom/Identify/Find/Identify/ Area of Interest
- Draw/Plot Control
 - Configurable Pick Lists
 - Drawing Controls: Pause, Edit, Move, etc
 - Advanced Display and Label Controls
 - “Publish to” Control
- Legend Controls
 - Layer Display
 - Map Tip Control
 - Base Map Source Control
 - Add Data Feed Control
- Tabbed Map Views

■ Mobile Mapping (“Smart Client”)

- All Web Mapping Features PLUS:
 - Synchronization Engine (‘Offline’ Use)
 - Integrated Hazard Models & GPS
 - Build/Run Query Tool
 - Map Data Import
 - Map/System Administration Tools

Best-in-class Open Architecture Solution

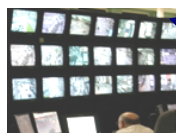

- ✓ **Service Oriented Architecture**
- ✓ **Microsoft Technology**
 - .NET Framework
 - SQL Server
 - Windows Communication Foundation (WCF)
- ✓ **Integrated Mapping**
 - EmerGeo Navigator (MapServer based)
 - OEM Option: ESRI ArcGIS® 9 and 10
- ✓ **Custom Application Data Connectors:**
 - Crisis Management Software
 - ESi WebEOC®, NC4 ETeam™
 - Mapping (GIS Systems)
 - EmerGeo Navigator, ESRI ArcGIS, Google Maps®, Microsoft Bing®, Open Street Map®
 - Dispatch and Vehicle Tracking Systems
 - STORM™
 - Emergency Notification Systems
 - ERMS™ (planned)
 - IP Cameras/Video Surveillance Interfaces
 - Any web accessible camera system
- ✓ **Live Data Feeds:**
 - Consumes:
 - GeoRSS, RSS, WMS, KML, ArcGIS Services
 - Publishes:
 - GeoRSS, WMS, KML

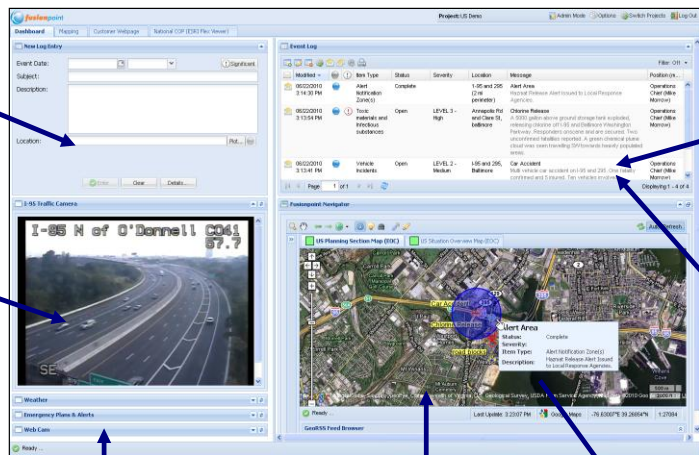

Bringing it all together

FILL OUT AN INCIDENT REPORT
Event Logging & Resource Management
